

Diary 1

songs, by Nena to commemorate the 25th Anniversary of the fall of the Berlin Wall... There is also an English version, but I love the German version :) ♥ Wow, I was a Junior in HS when this happened, and it gave me chills then, and even still now... We take so much for granted in this country. This day just makes me even more grateful for the USA :) Good nite all, and have a blessed week ahead... :)

GET IN THE CAR LANCE YOU BITCH

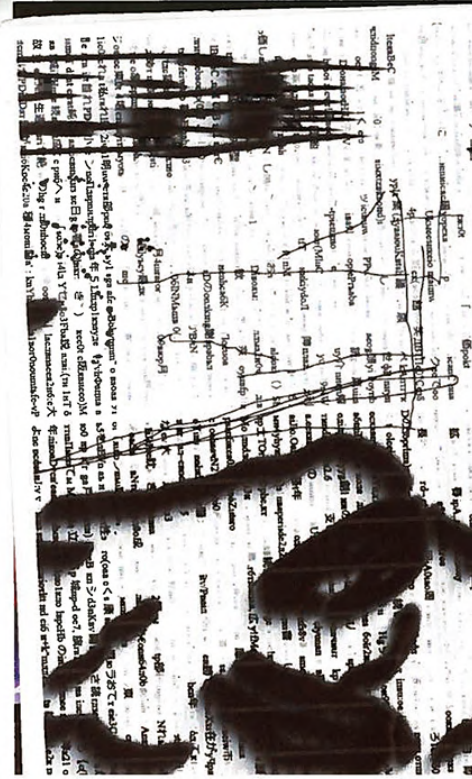

First off your taking it literally and wrong. Interpret the lyrics instead of just automatically taking someone else's interpretations as facts. The song is about 99 balloons being set free and a pilot sent to investigate shoots the balloons down purposely. This shooting causes nations to panic and start a 99 year war.

It is said German is a "dirty" language. That it sounds vulgar. I think it sounds sexy as hell.

WATCHMOJO BROUGHT ME HERE. I LIKE THIS SONG. OH AND COD SUCKS. BATTLEFIELD RULES

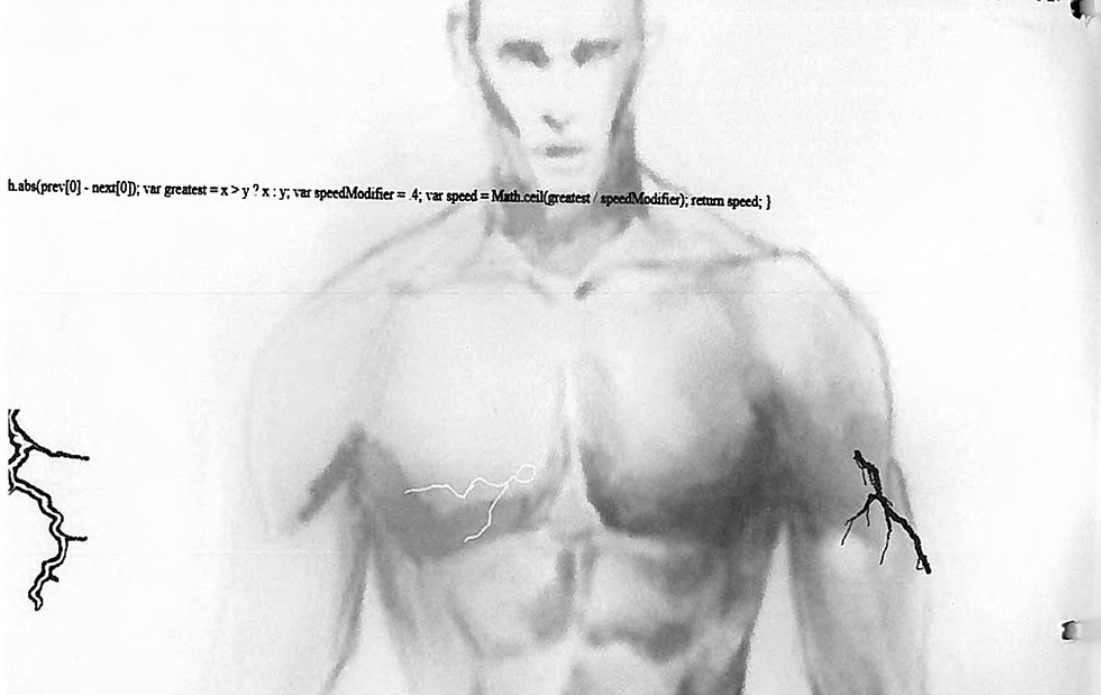

This version is of course phenomenal... hands down better, of course, it is the version originally composed with the music. It would be like translating a masterpiece into a foreign language then reading it in the original; things are always lost in the translation; subtle nuances.....

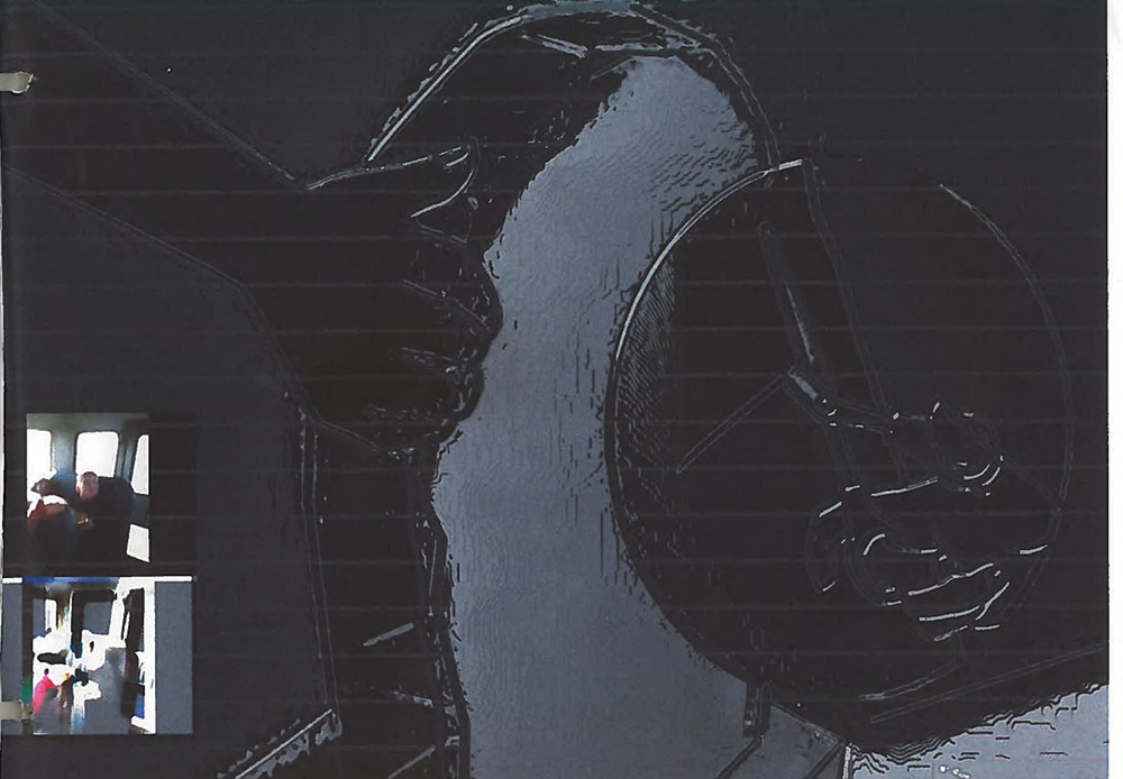

```
function ready(function () { newDiv(); newDiv(); newDiv(); newDiv(); newDiv(); newDiv(); }); function newDiv() { var div = <div class="animatedDiv"> </div>; append($div); animateDiv(); function animateDiv() { var newq = makeNewPosition(); var oldq = $div.offset(); var speed = calcSpeed([oldq.top, oldq.left], newq); $div.animate({ top: newq[0], left: newq[1] }, speed, function () { animateDiv(); }); }; } function makeNewPosition() { // Get viewport dimensions (remove the dimension of the div) var h = $(window).height() - 50; var w = $(window).width() - 50; var nh = Math.floor(Math.random() * h); var nw = Math.floor(Math.random() * w); return [nh, nw]; } function calcSpeed(prev, next) { var x = Math.abs(prev[1] - next[1]); var y = Math.abs(prev[0] - next[0]); var greatest = x > y ? x : y; var speedModifier = 4; var speed = Math.ceil(greatest / speedModifier); return speed; }
```

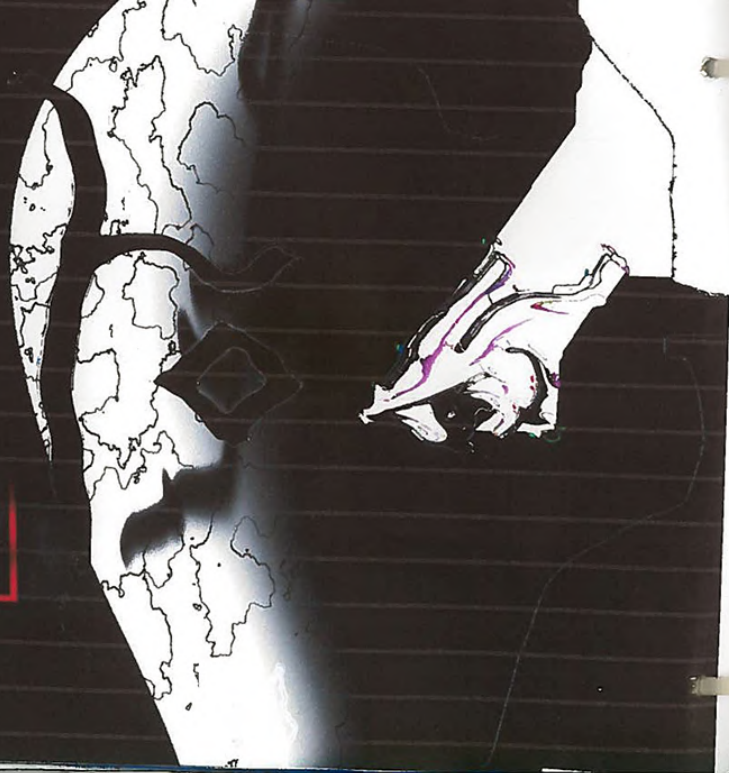

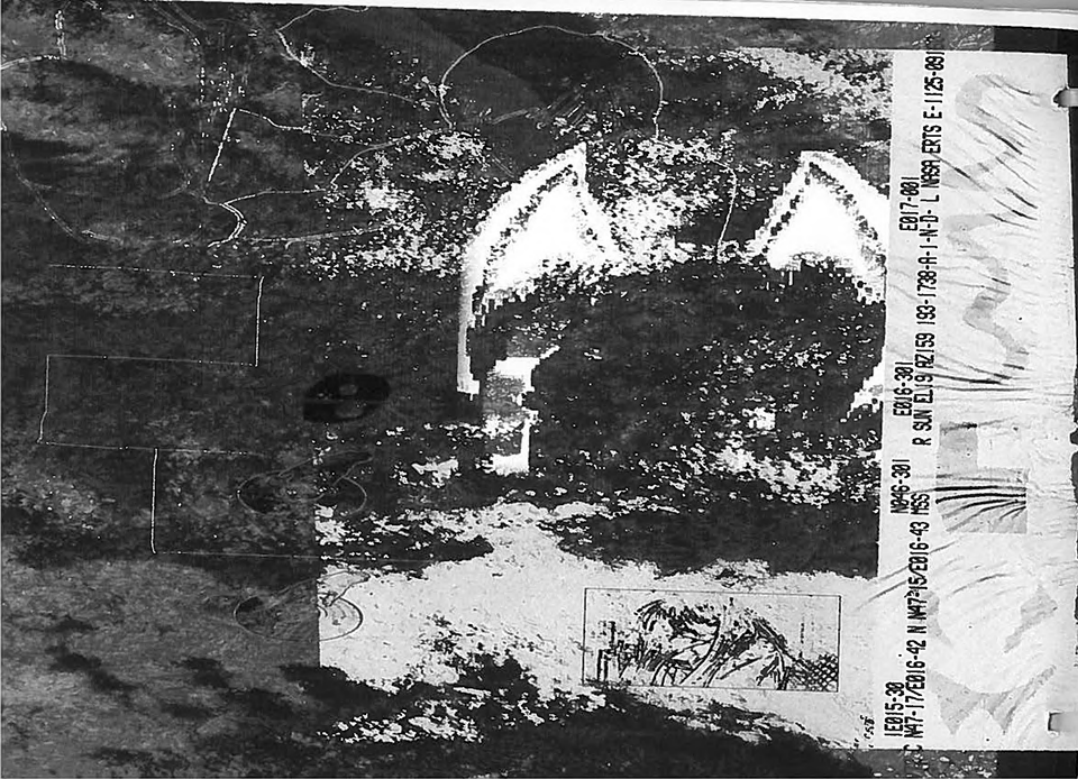

```
function ready(function () { newDiv(); newDiv(); newDiv(); newDiv(); newDiv(); newDiv(); }); function newDiv() { var div = <div class="animatedDiv"> </div>; append($div); animateDiv(); function animateDiv() { var newq = makeNewPosition(); var oldq = $div.offset(); var speed = calcSpeed([oldq.top, oldq.left], newq); $div.animate({ top: newq[0], left: newq[1] }, speed, function () { animateDiv(); }); }; } function makeNewPosition() { // Get viewport dimensions (remove the dimension of the div) var h = $(window).height() - 50; var w = $(window).width() - 50; var nh = Math.floor(Math.random() * h); var nw = Math.floor(Math.random() * w); return [nh, nw]; } function calcSpeed(prev, next) { var x = Math.abs(prev[1] - next[1]); var y = Math.abs(prev[0] - next[0]); var greatest = x > y ? x : y; var speedModifier = 4; var speed = Math.ceil(greatest / speedModifier); return speed; }
